

Dear Mira Vista Families,

Before you know it, it will be time for school to start back again, and you will be entering the seventh grade. Allow us to introduce ourselves. Teaching English and Science is Mr. Lackey, Math and History is Ms. Madrid. We have been working together for the last three years and we cannot wait to have you in our classrooms. The year will be filled with engaging yet challenging curriculum and projects. There are a few things you can do to help get you ready:

- 1) Complete the summer reading. Please read the attached paper for directions.
- 2) Practice fluency facts with addition, multiplication, division, and subtraction, fractions, and decimals.
- 3) Start thinking of project ideas for the science fair.
- 4) Read current events over the summer and summarize the main ideas and points of view in your own words.
- 5) Gather supplies before the first day of school. Attached is the list.
- 6) Attend Middle School Orientation.

If you have any comments, questions, and/or concerns, please email us!
